About Sebastien Vasey

> I wonder if I've been changed in the night? Let me think: was I the same when I got up this morning? I almost think I can remember feeling a little different. But if I'm not the same, the next question is, Who in the world am I? Ah, *that's* the great puzzle![1]

1   Who am I ?

I am a student. I enjoy studying everything that gravitates around Science. I am especially interested in Mathematics, Computer Science and Communication. I am registered as a master student in Communication Systems[3] at EPFL[4] (and I have a bachelor in the same field, at the same school). Starting from August 2011, I will be an exchange student at CMU[5].

I am also a programmer, and enjoy the *fun* of writing software. I use this web site to publish some of my work[6]. My programs are available as free software[7].

2   Contact information

2.1   Email

My email address is:

    sebastien dot vasey at gmail dot com

Of course, you should remove the spaces, and replace the "dot" and "at" parts by their respective symbol on the keyboard. This is just a clumsy attempt to fool spambots.

Feel free to send me any comments, questions, rants, thanks or other words of wisdom you might have.

2.2   Privacy Now !

Because I highly value my privacy, and fully agree with the arguments put forward in Why I wrote PGP[8], or this Non-Technical PGP FAQ[9], I have been using PGP (actually the free implementation GnuPG[10]) since 2007.

You can get my PGP key[11] (`4D5ADB32`) here, or from a key server like `subkeys.pgp.net`. The fingerprint is:

```
C88F 230E 4053 D94A 64C8  2D53 FB58 40DD 4D5A DB32
```

I always sign my outgoing messages, and encourage you to do the same, as well as encrypt them.

I also sign all the software releases for download from that site. Please warn me if you find an unsigned one.

Note: the key id and fingerprint were updated on February 7th, 2010 (the text above was changed accordingly): see my key transition statement[12].
