

# Old Stuff

## 1 Software

- Some scripts working together to make your computer play some music when it boots<sup>1</sup>.
- Autonet<sup>2</sup> is a simple, quick and dirty network manager.
- Simplewp<sup>3</sup> compiles a full static website from simple reStructuredText<sup>4</sup> files.
- python-svlib<sup>5</sup>: Some utility functions a lot of my programs use
- svbluetooth<sup>6</sup>: Scripts to do some bluetooth file transfer with my mobile phone
- svrst<sup>7</sup>: Customized reStructuredText<sup>8</sup> builders to be able to write math equations in Latex.
- svmonitor<sup>9</sup>: Manage and run some tests on your system
- s3archive<sup>10</sup>: Backup the files you store on Amazon S3.
- with-tsocks<sup>11</sup>: Wrapper script to “socksify” and make its network traffic go through an SSH tunnel.
- Openconnect helpers<sup>12</sup>: Wrapper script around openconnect<sup>13</sup> to easily connect to a VPN Network.
- List2pkg<sup>14</sup> is a simple script to create Slackware packages from lists of files (useful mainly in conjunction with Urpkg<sup>15</sup>).
