

EEE 901 Documentation

Documents my experience with the EEE PC 901¹

1 Problems that could happen

This is just a list of problems that happened to me, and how I fixed them

1.1 Wireless card stops working

1.1.1 The problem

Wireless is not working properly, doing a:

```
$ ifconfig ra0
```

just returns something like: `interface not found`.

1.1.2 The solution

The card is probably disabled in the BIOS. I have no clue why it suddenly disables, but that happened to me once and this is the first thing to check. Also, check out `/proc/acpi/asus/wlan` to see if wireless is on (1) or off (0).
