

MultiMarkdown documentation

I used to be a MultiMarkdown¹ user. Here is a very small and incomplete cheat sheet for things I could not find immediately.

1 Some mathematical symbols

- Big Oh notation: Just use `O(g(n))`
- Big Theta notation: `f in \Theta(g(n))`
- Big omega notation: `f in \Omega(g(n))`
- Ceiling (upper value): `\lceil(n/2)\rceil`
- Floor (lower value): `\lfloor(n/2)\rfloor`
